Summary

Hi, I am Nik – system designer, programmer, software engineer. I speak English and Russian. Current CGPA: 3.7. I have been building projects since 2021, worked with domains, corporate setup, and deployments. I have worked extensively with CLI, VPS (Linux: Ubuntu), Web & Mobile apps, APIs (WA, Telegram, LLM, FastAPI, RestAPI), Hugging Face, Databases, AWS, WordPress.

Education

Middle School	High School	University – BCS in AI
College of Informatics, Russia	CIC Private School, Canada	APU University, Malaysia
2022	2022-2024	2024-Present

Soft Skills

I am open-minded, proactive, disciplined, responsible, kind, determined, project-oriented, team-oriented. I am a fast learner with agile mindset. I am team player, but also succeed on individual projects. I pay a lot of attention to details. I am keen on learning and improving myself. I always try to see a bigger picture, recognizing systems as a whole, not just as separate parts.

Hard Skills

Each of listed skills is mastered at different level. Not all, only selected skills shown.

Python · SQL · HTML · Linux · GitHub · Services (aws) · Firebase

Java · JavaScript · CSS · R · Figma · WordPress · Redis

Selected Projects

Finim
Multilingual Chatbot
I gained experience with AWS infrastructure, i18n for the whole web app. Learned to work solo fast utilizing LLMs. Deployed on my own VPS (Ubuntu). TypeScript, NextJS, Tailwind.

SARA
RAG for APU Knowledge Base
I gained experience with RAG architecture, vector embeddings, tokenization. Learned to work in a team of 6 under CIO at APU. Main tools: Python, LangChain ChromaDB, Ollama.

StudyBuddy
Social Media for Students
I gained experience with Web Development, DevOps, Deployment, task allocations. Learned to work independently in a team of 2. Main tools used: HTML, CSS, JS, Python, APIs, Firebase.
